## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Any rejection not set forth below has been withdrawn.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Hori et al. US 5,663,261.

As to Claims 1-5, Hori et al. '261 discloses a polymer comprising a monofunctioning monomer component formula 1 (Col. 2, Line 11-18) and formula 4 (Col. 2, Line 50-55). Examiner interprets formula 2 as the amide bond containing acrylic (Col. 2, Line 24-30) and formula 3 (Col. 2, Line 37-43) as a polyfunctioning monomer R6 being an alkylene group which would have a different reactive site than the vinyl group (Col. 2, Line 5-50). The reference discloses a film which the examiner interprets as a sheet which would be capable of absorbing a liquid. The nonaqueous electrolyte solution is an intended use that doesn't further limit the claim.

As to Claim 2, Hori et al. '261 discloses the use of phenoxyethylene glycol mono(meth)acrylate (Col. 3, Line 47-48).

As to Claim 3, Hori et al. '261 discloses N,N-diethyl(meth)acrylate and N,N-(meth)acrylamide (Col. 3, Line 14-50).

As to Claim 4, 7, & 8, Hori et al. discloses putting the resin layer over a substrate (i.e. hair) (Col. 9, Line 24-29) and further discloses uses on different base materials (Col. 6, Line 20-23).

***Allowable Subject Matter***

Claim 6 would be allowable if written in independent form incorporating Claim 1. The nonaqueous electrolyte solution utilized with a nonaqueous electrolyte battery pack further describes the claim.
